

# An Optimal Wound Environment Requires Optimal Balance

## Microdacyn® Negative-Pressure Wound Therapy Solution™ Cleans and Irrigates Wounds Undergoing Negative-Pressure Wound Therapy

Microdacyn® Negative-Pressure Wound Therapy Solution™ complements a wide array of negative-pressure therapies including those offered by KCI, Smith & Nephew and Innovative Therapies.

- Does not contain antibiotics, and as a result, evidence to date indicates it does not promote antibiotic resistance
- Assists in the physical removal of biofilm, a major deterrent in wound healing
- Helps reduce odor by removing necrotic tissue
- Ready-to-use, requires no mixing, no diluting and no rinsing—leaves no residue in the wound bed
- Easily disposed of without biohazard precautions
- Spikeable and unbreakable plastic bottles with foldable hang tab bases in 990mL presentation
- Easily hung from the NPWT device or IV pole

**Microdacyn®**  
Negative-Pressure Wound Therapy Solution™

\*The solution contains sodium hypochlorite and hypochlorous acid which act as preservatives to reduce/prevent the growth of microorganisms within the solution. The effect of this product in the wound bed has not been tested clinically.
